

BOB THE DOG AKA: DON HOUSDEN BIBLIOGRAPHY

I grew up in a musical family. My grandmother played contemporary jazz and my father played piano, organ, guitar and sung. My father played at local dances and at the original Tiny's fruit stand located on the old highway 99. My father transported his Hammon organ to dances on the back of his 1941 Chevy truck.

I play a variety of instruments such as key board to guitar. I create original songs and tie them into my video and graphing business. I have a sound studio where I produce DVDs for musicians, slide show presentations customized to special occasions such as anniversaries and birthdays. I use my creative talents and imagination to create original works. Please contact me for more details.
